Location: Egypt

Professional Summary

Motivated .NET Full Stack Developer seeking a backend or full stack internship. Strong foundation in C#, OOP, LINQ, and ASP.NET Core for building scalable and maintainable web applications. Experienced in applying Clean Architecture, SOLID principles, CQRS, and Design Patterns (Repository, Unit of Work, Strategy).

Skilled in database design with SQL Server and PostgreSQL, performance optimization using Redis and in-memory caching, and API development using REST and gRPC. Familiar with frontend development using Angular, JavaScript, and modern CSS frameworks. Passionate about clean code, software architecture, and continuous learning.

Technical Skills

Programming & Core Concepts

C#, OOP, LINQ, Data Structures, Algorithms

Backend Development

ASP.NET Core Web API, Entity Framework Core, Dapper, ASP.NET Core Identity, FastEndpoints, SignalR, gRPC, FluentValidation, Localization, RESTful APIs

Architecture & Design

Clean Architecture, CQRS, SOLID Principles, Domain-Driven Design (DDD)
Design Patterns (Repository, Unit of Work, Strategy)

Caching & Performance

Redis, In-Memory Caching, Basic Load Testing (k6)

Frontend Development

HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, Angular

Databases

Microsoft SQL Server, PostgreSQL, Database Design, Query Optimization

DevOps & Tools

Git, GitHub, Docker (Basics), CI/CD Pipelines (Basics), Swagger, Unit Testing (xUnit, NUnit)

Learning Timeline

Backend Development: Jan 15, 2022

Frontend Development: Started Jun 15, 2025

Projects

MarketPOS.API – Jan 2023

Architected a scalable POS backend system using ASP.NET Core.
Implemented Clean Architecture and CQRS pattern

- Designed multi-unit inventory system
- Applied Strategy Pattern for dynamic discount calculation

- Technologies: ASP.NET Core, EF Core, SQL Server, CQRS
GitHub: github.com/youssefelmesedy/MarketPOS.API
-

Swanie.API Jul 2024 – Present

Developing a social platform backend with role-based access and geo-filtering.

- Applied Clean Architecture and CQRS
 - Implemented role-based dashboards
- Technologies: ASP.NET Core, Blazor, EF Core
GitHub: github.com/youssefelmesedy/Swanie.API
-

TaskManager – Mar 2024

Task and appointment management system with notification services.

Technologies: ASP.NET Core, SQL Server

GameZone – Sep 2024

MVC web application for uploading and sharing compressed game files.

Technologies: ASP.NET MVC, SQL Server

GoTicket – Nov 2024

Online train and bus ticket booking system.

Technologies: ASP.NET Core, EF Core

Experience

Freelance Software Developer

Remote | January 2024 – Present

- Built full-stack applications using ASP.NET Core and Blazor
 - Applied Clean Architecture and CQRS for modular APIs
 - Designed domain models following DDD principles
 - Performed load testing using k6
 - Integrated middleware for validation, logging, and exception handling
-

Education

Bachelor of Computer Science

Menofia University

Expected Graduation: 2027

Languages

Arabic: Native

English: Very Good (Written and Spoken)

Currently Learning

Rust for high-performance backend systems

Advanced system design concepts
