

# Youssef Mostafa Elmesedy

## Backend .NET Developer

Email: yousefelmesedy6@gmail.com

Phone: +20 120 883 0569

LinkedIn: linkedin.com/in/yousef-el-mesedy-46b566291

GitHub: github.com/youssefelmesedy

Location: Egypt

---

## Professional Summary

Motivated Backend .NET Developer seeking a Backend Internship or Junior Backend Position. Hands-on experience building scalable RESTful APIs and backend systems through real-world personal projects using ASP.NET Core, Clean Architecture, MVC Architecture, and CQRS. Strong foundation in C#, OOP, LINQ, and database design. Experienced in applying SOLID principles and design patterns to build maintainable and modular systems. Passionate about backend engineering, performance optimization, and writing clean, production-ready code.

---

## TECHNICAL SKILLS

### Programming & Core Concepts

C#, OOP, LINQ, Data Structures, Algorithms

### Backend Development

ASP.NET Core Web API, ASP.NET MVC, Entity Framework Core, Dapper

ASP.NET Core Identity, FastEndpoints, SignalR, gRPC

RESTful API Design, FluentValidation, Localization

### Architecture & Design

MVC Architecture, Clean Architecture, CQRS, SOLID Principles, Domain-Driven Design (DDD)

Design Patterns (Repository, Unit of Work, Strategy)

### Caching & Performance

Redis, In-Memory Caching, Basic Load Testing (k6)

### Databases

Microsoft SQL Server, PostgreSQL, Database Design, Query Optimization

### DevOps & Tools

Git, GitHub, Docker (Basics), CI/CD Pipelines (Basics), Swagger, Unit Testing (xUnit, NUnit)

### Learning Timeline

Backend Development: Started Jan 15, 2022

---

## Projects

### MarketPOS.API – Jan 2023

Architected a scalable POS backend system using ASP.NET Core.

Implemented Clean Architecture and CQRS pattern

- Designed multi-unit inventory system
    - Applied Strategy Pattern for dynamic discount calculation
  - Technologies: ASP.NET Core, EF Core, SQL Server, CQRS
- GitHub: [github.com/youssefelmesedy/MarketPOS.API](https://github.com/youssefelmesedy/MarketPOS.API)

---

### Swanie.API Jul 2024 – Present

Developing a social platform backend with role-based access and geo-filtering.

- Applied Clean Architecture and CQRS

- Implemented role-based dashboards  
Technologies: ASP.NET Core, Blazor, EF Core  
GitHub: [github.com/youssefelmesedy/Swanie.API](https://github.com/youssefelmesedy/Swanie.API)

---

### **TaskManager** – Mar 2024

Task and appointment management system with notification services.

Technologies: ASP.NET Core, SQL Server

---

### **GameZone** – Sep 2024

MVC web application for uploading and sharing compressed game files.

Technologies: ASP.NET MVC, SQL Server

---

### **GoTicket** – Nov 2024

Online train and bus ticket booking system.

Technologies: ASP.NET Core, EF Core

---

## **EXPERIENCE**

### **Backend Developer (Personal Projects & Practical Training)**

January 2024 – Present

- Designed and built RESTful APIs using ASP.NET Core following MVC architecture
- Applied Clean Architecture and CQRS to structure scalable backend systems
- Modeled domain logic following DDD principles
- Implemented authentication and authorization using ASP.NET Core Identity
- Applied Redis and In-Memory Caching to optimize performance
- Conducted basic load testing using k6
- Used Git and GitHub for version control and project management
- Containerized applications using Docker (basic usage)

---

## **Education**

Bachelor of Computer Science

Menofia University

Expected Graduation: 2027

---

## **Languages**

Arabic: Native

English: Very Good (Written and Spoken)

---

## **Currently Learning**

CURRENTLY LEARNING

Frontend Development (Started June 15, 2025)

Currently expanding knowledge in Angular, JavaScript, and modern CSS frameworks to strengthen full-stack capabilities while maintaining backend specialization.
